Giant Double GERBERAS

This is the finest strain of these gloriously-colored Transvaal Daisies, available now after years of painstaking selection. Double Gerberas are nearly ever-blooming, often producing long-stemmed flowers ten months out of the year.

We are offering these fine plants in clumps, and as this double variety does not produce seed, it has taken several years to accumulate enough quantity to justify our offering them to our customers.

Gerberas are ideal for cutting, are long stemmed and very lasting. Plant them in full sun; soil should be well drained and should not be allowed to cover the crown, or center, of the plants. Water thoroughly, and then wait until soil is fairly dry before irrigating again.

AMARILLO—Yellow.

LA PALOMA—Deep rose.

DIABLO—Light red.

LA GOLONDRINA—Orange.

HERMOSA—Pink.

Clumps—75 cents each 3 for \$2.00

Summer Blooming Sweet Peas

The new Cuthbertson Sweet Peas will bring you masses of large fragrant flowers through the hot summer. This new variety is heat resistant and produces large flowers in lovely, distinct colors on long stems. Order some now. Enough for a 30 foot row in mixed colors.

Only 50c

Remember, Tomlinson's Select Nurseries send you these items with tax and postage paid. Not only do you save time and energy in shopping, but you save money as well. You are cordially invited to visit us at 11758 E. Whittier Blvd., on Highway 101, Whittier.

PINK

PINK PERFECTION. Formal double pink, probably the most popular and famous of all Camellias. Blooms early and is very prolific.

ROSEDALE'S BEAUTY. A fine formal flower of shiny pink. Free-flowing and occasionally showing a few stamens at the center.

RED

PRINCESS BACCHIOCHI. This is one of the best among the double peony-type Camellias. The color is rich velvety carmine red.

VARIEGATED

FANNY BOLIS. Big red flowers, blotched with white, enormous petals, loosely arranged. Blooms are often from 4 to 6 inches across.

JORDAN'S PRIDE (Herme). Very popular. Semi-double flowers of light rose with irregular white border and deeper streaks and splotches of deeper pink.

BELLA ROMANA. Very striking. Most of the big, double flowers are pink, profusely striped and splashed with streaks of carmine.

WHITE

ALBA SUPERBA. Magnificent semi-double pure white. Large outer petals cupped about the yellow stamens in the center. Often called Rev. John G. Drayton on the Pacific Coast.

PURITY. The standard of white Camellias. Full double snow white flowers of nice corsage size, showing delicate golden stamens in the center.

The exquisite waxy flowers with their many delicate shades, and the glossy, green foliage of these plants make them a "must" in Southern California Gardens. By following a few primary requirements, you will find Camellias need less attention than other plants in your garden. Plant in a sheltered, semi-sunny location with well-drained soil. The addition of 60 percent or more of leaf mold or peat moss to the soil will give best results. Camellias are hardy to 10 degrees.

"FLORIST" CARNATIONS

*Lovely Colors, Exquisite Fragrance
From Strong "Select" Plants*

35c each

Tax and Postage Paid

We have assembled a full color range of fine carnations for you to take a full collection or any single colors you desire. At this special price you will want to have fragrant carnations in your garden. **Choose from these colors—red, pink, light pink, yellow, white, and variegated.** Please order by color, and remember—you save not only in price of the plants, but on tax and postage.

CARNATIONS ARE EASY TO GROW! Plant carnations in well-drained soil, in a sunny location. Keep plants pinched back until many shoots have developed from the base. When plants become well rounded in form, let the flower shoots develop. For largest flowers, disbud so that only one bud remains on each stem.

Feed complete plant food in spring and summer for larger and more abundant blooms. Carnations need stakes for best results, and lime or ashes help keep the soil pH correct.

Plant America!
